# CUBICLES

Stratificato Print HPL offers wall panels that completely replace traditional masonry, thus minimizing all types of maintenance.

This type of wall is erected in very short timeframes, providing a finished space without the need for further works.

The structure usually sits on adjustable aluminum feet, to facilitate cleaning of the floors.

This type of installation is widely used in all applications where a high level of hygiene is required, without compromising the aesthetic features required of contemporary fit-outs.

Take your design to the next level with the different solutions that we offer (cnc machines, digital print,...)
